

At ELWA, we are working on the urgently needed implementation of decarbonization in industrial companies with our technologies and products manufactured in-house. As one of the world's leading specialists in the electrical heating of fluids in industrial applications, we want to contribute to sustainable rethinking. We are proud of this contribution and every project we implement, and we stand confidently behind our product portfolio. The challenge of converting our customers' thermal processes from fossil fuels to electric heating is what drives us and connects our employees with our sustainable mission.

We would love to have you join our mission of decarbonization.

We are looking for you as:

Project and development engineer (m/f/d)

These tasks await you:

- Technical contact person for sales, our customers and suppliers
- You will create detailed technical drawings, test instructions and parts lists for our products
